ATELIER  
*Loupiote*

# ATELIER Loupiote

Designed and produced in **Lyon, France**, Atelier Loupiote represents a new **eco-friendly** concept with UL listed products.

It emerged from the collaboration between an architect and engineer who wanted to revolutionize the illumination of interior spaces. Today, it is a team of design enthusiasts with diverse skills who see lighting not just as an object, but as a decorative element that illuminates any interiors with elegance and warmth.

Atelier Loupiote aims to be a pioneering force in re-localizing lighting production in France, promoting the craftsmanship of laser-cut wood using locally sourced FSC-certified materials and maintaining an **ecological approach** by providing flat packaging without any plastic to minimize CO2 emissions. Through their various designs, they offer quality and product durability by combining aesthetics, simplicity, and functionality.

Made in France using wood craftsmanship

Using FSC-certified poplar wood

Flat packaging with 0 plastic

Lamps are UL-certified
